Expansion Couplings Shedule 40 PVC Two Piece

PVC Expansion Conduit Coupling. These couplings have a piston that extends and retracts to compensate for length changes of PVC conduit

APPLICATIONS

- Retractable drain pipe direct pipe, including an internal pipe and an external pipe
- They're often used where there are large fluctuations in temperature, which can cause conduit to expand and contract
- Can be installed vertically or horizontally

FEATURES

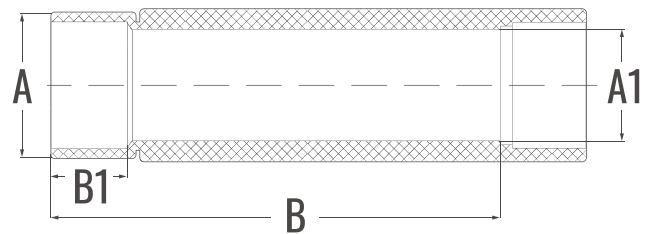

- Easy and simple use kit
- The length and size can be adjusted according to different needs
- Good sealing performance, so that the pipeline no longer leaks.
- The installation solves the problem once, the operation is convenient, simple and fast, and provides great convenience for friends engaged in construction engineering water supply and drainage work
