Simple Support Bracket Fit

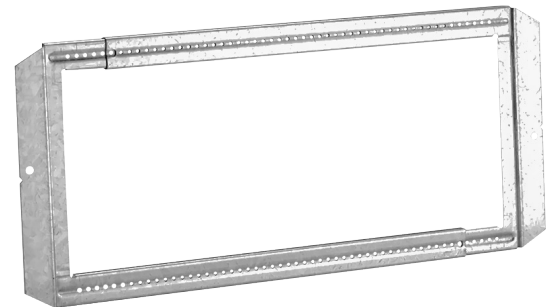

APPLICATION

- Expands from 15" to 25" to suit all common wall stud and hard lid ceiling cavities
- First telescoping bracket to accept 4", 4-11/16" and 5" square boxes
- Quickly and easily mount junction boxes anywhere between studs, via snap-on Adapters
- Rigid, double-rail design requires no extra back support – even at full extension! Up to three outlet boxes between 24" stud bays

FEATURE

- Mount boxes between studs or overhead between hard lid ceiling joists
- Install boxes quickly with snap-on Adapters
- Slide junction box to critical position
- Add and remove boxes without detaching from studs or disassembling bracket
- Mounts up to three junction boxes between 24" wall studs
- Rigidity eliminates need for far-side back support
- Horizontal pin-holes provide quick starting point for screws
- Compatible with UL Adjustable Rings
- Ideal for Prefabrication: collapse and expand without removing junction boxes or adapters
- Recommended for use with boxes 2-1/8" deep or deeper

MATERIAL

Steel

PACKAGING
